# AirMassage

For the Ultimate Soft Tissue Massage

## About ► Balboa Water Group

The Air Massage Systems in whirlpool baths can bring years of delight, relaxation, happiness and satisfaction. The air massage is used to relax and relieve stress; providing both numerous health and therapeutic benefits, while maintaining the highest in hygienic standards.

At Balboa, our fundamental commitment to the leisure water industry has been to provide a simple, comprehensive, single source solution to our products that include the highest quality – a mentality that has earned us the position as the leading global supplier of product design, state-of-the-art manufacturing, and an unsurpassed reputation for reliability across the globe.

## Air ► The Essential Provenance of Life

The Air Bath was originally defined by Benjamin Franklin, who believed that for good health it was important to take a daily "air bath." Europe adapted the Massage Air Bath in the 1980's for hospital use to provide a therapeutic, non-aggressive soft tissue massage for their patients.

The Air Massage relaxes the muscles, while simultaneously stimulating the production of endorphins in the body. Millions of tiny warm bubbles are released to provide a soft tissue massage that aids in the relief of pain, soothes the body, aids in muscle relaxation, increases blood circulation, strengthens the immune system and improves oxygen flow through the body.

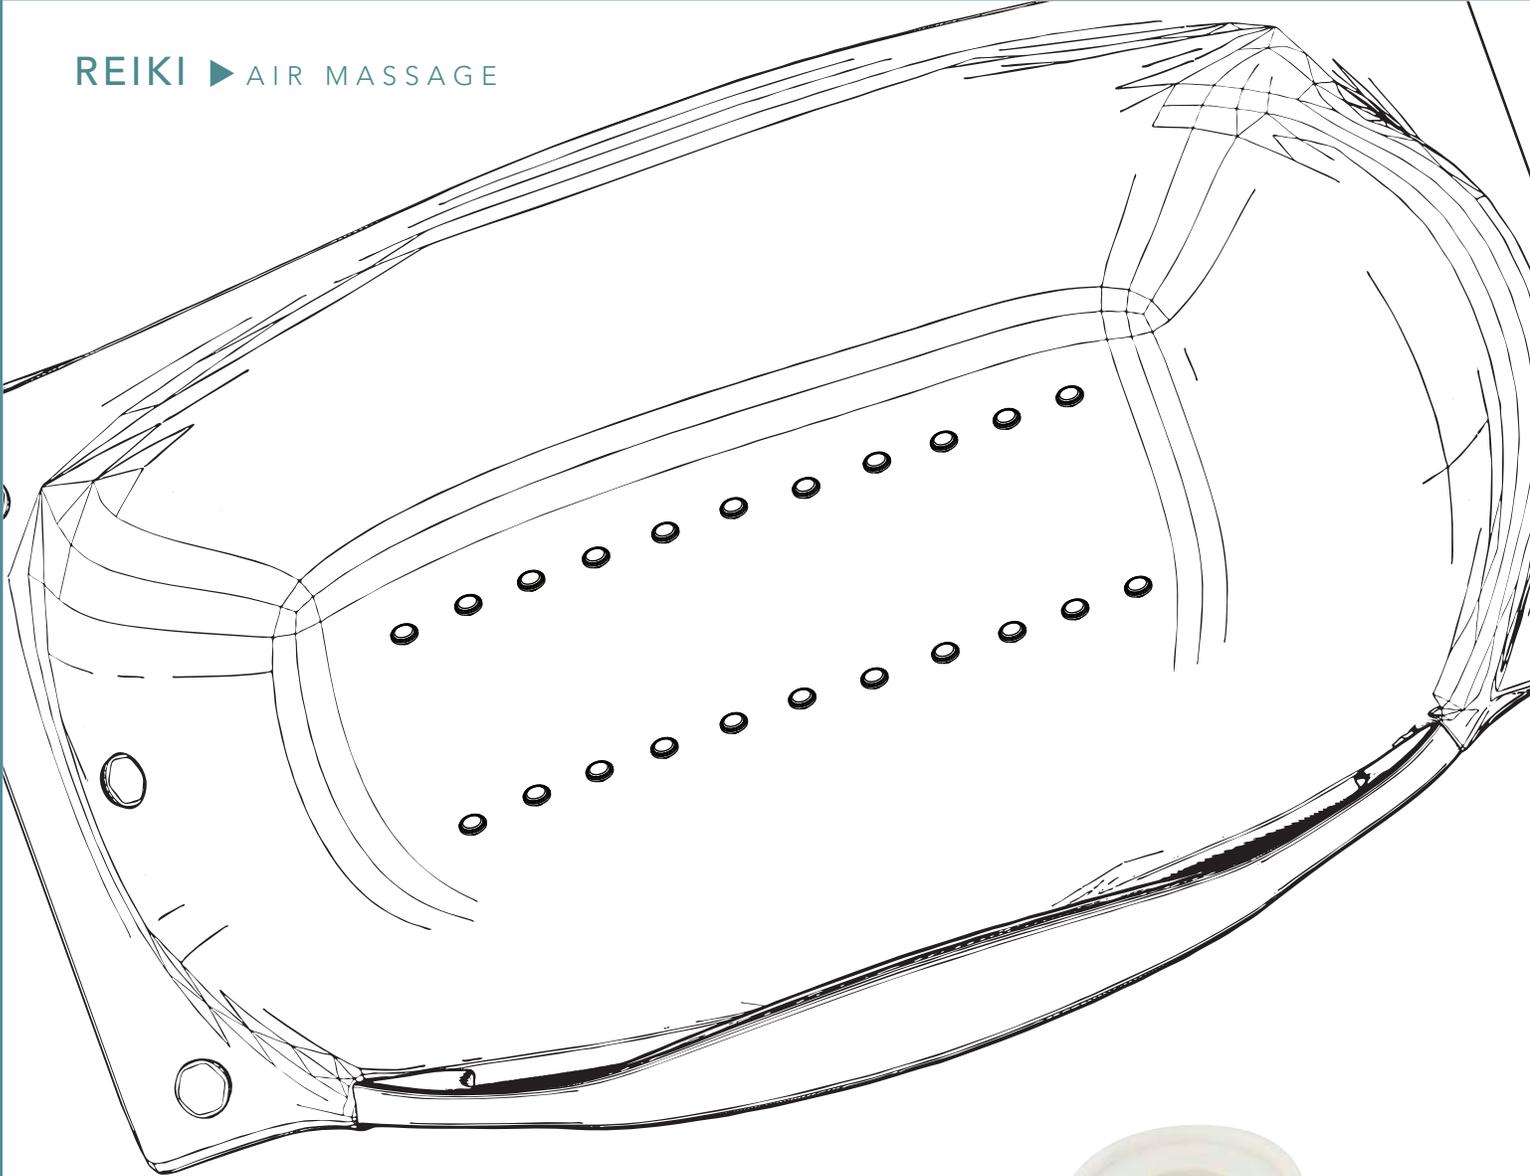

## Reiki ► Air Massage

One of the greatest benefits of the Reiki air jet massage is the relief of stress and tension. Surrounded by large, soft bubbles, the natural hot water therapy gently aids in a better sleep, promoting inner healing and numerous other health benefits. When we are relaxed and stress-free, we are able to restore our natural ability to heal. The Balboa Water Group Reiki Air Massage Jets are for use at any moment, any time, any where for on-the-spot stress release or just a relaxing soak.

▶ THE ESSENTIAL COMPONENT OF THE AIR MASSAGE SYSTEM

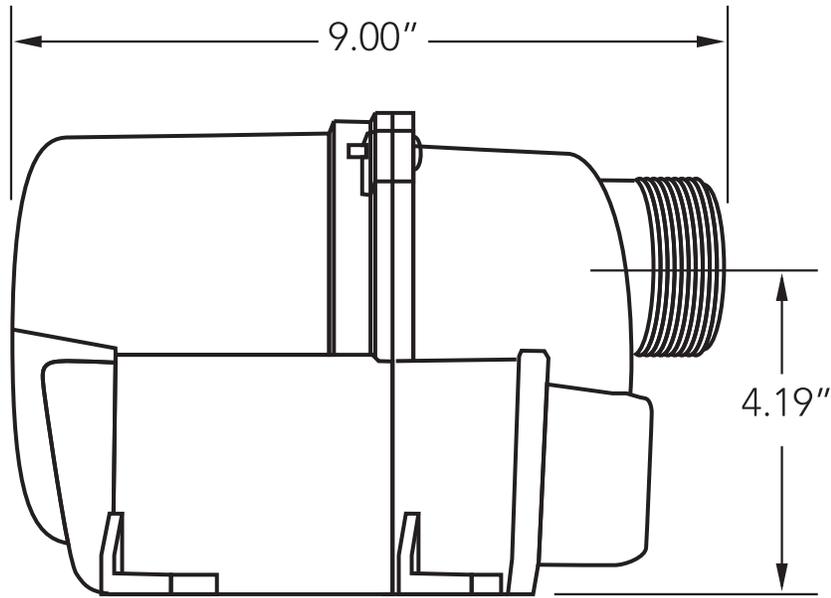

## The Blower ► The Essential Component of the Air Massage System

The Balboa Water Group blower is the essential component of the Air Massage System. With unmatched performance, proven reliability and a small compact footprint, it offers the ultimate in bathing relaxation. Consisting of a built-in heater, a quiet motor, small (for constrained space installations), and UL (safety) recognition, the BWG blower works with any control. Ease of installation, service and use.

# THE BLOWER ►

THE ESSENTIAL COMPONENT OF THE AIR MASSAGE SYSTEM

INTERNAL MOTOR

INTERNAL HEATER

## ELECTRONIC CONTROLS ►

### THE CONTROL OF THE AIR MASSAGE SYSTEM

#### 2-BUTTON BATH CONTROL

- Operation:** Can operate a blower, single speed pumps, variable speed pumps, jets, chromatherapy and lights
- Buttons:** Therapy and light buttons
- Blower Modes:** Operates two modes: wave mode and pulse mode  
Variable speeds
- Session Timer:** 30 minute timer. The timer is adjustable.
- Optional:** The light button can be controlled independently of all other features

#### 4-BUTTON BATH CONTROL

- Operation:** Can operate a blower, single speed pumps, variable speed pumps, jets, chromatherapy and lights
- Buttons:** Blower, light and speed buttons
- Blower Modes:** Operates two modes: wave mode and pulse mode  
Variable speeds
- Session Timer:** 30 minute timer. The timer is adjustable.
- Optional:** The light button can be controlled independently of all other features

#### 6-BUTTON BATH CONTROL

- Operation:** Can operate a blower, single speed pumps, variable speed pumps, jets, chromatherapy and lights
- Buttons:** Therapy, light, blower, massage, back jet, massage

#### MASSAGE BUTTON

Change speed (back jet/pillow)

#### BLOWER BUTTON

Allows for a "purge" cycle. Variable speeds

#### THERAPY BUTTON

Button press turns therapy on/off

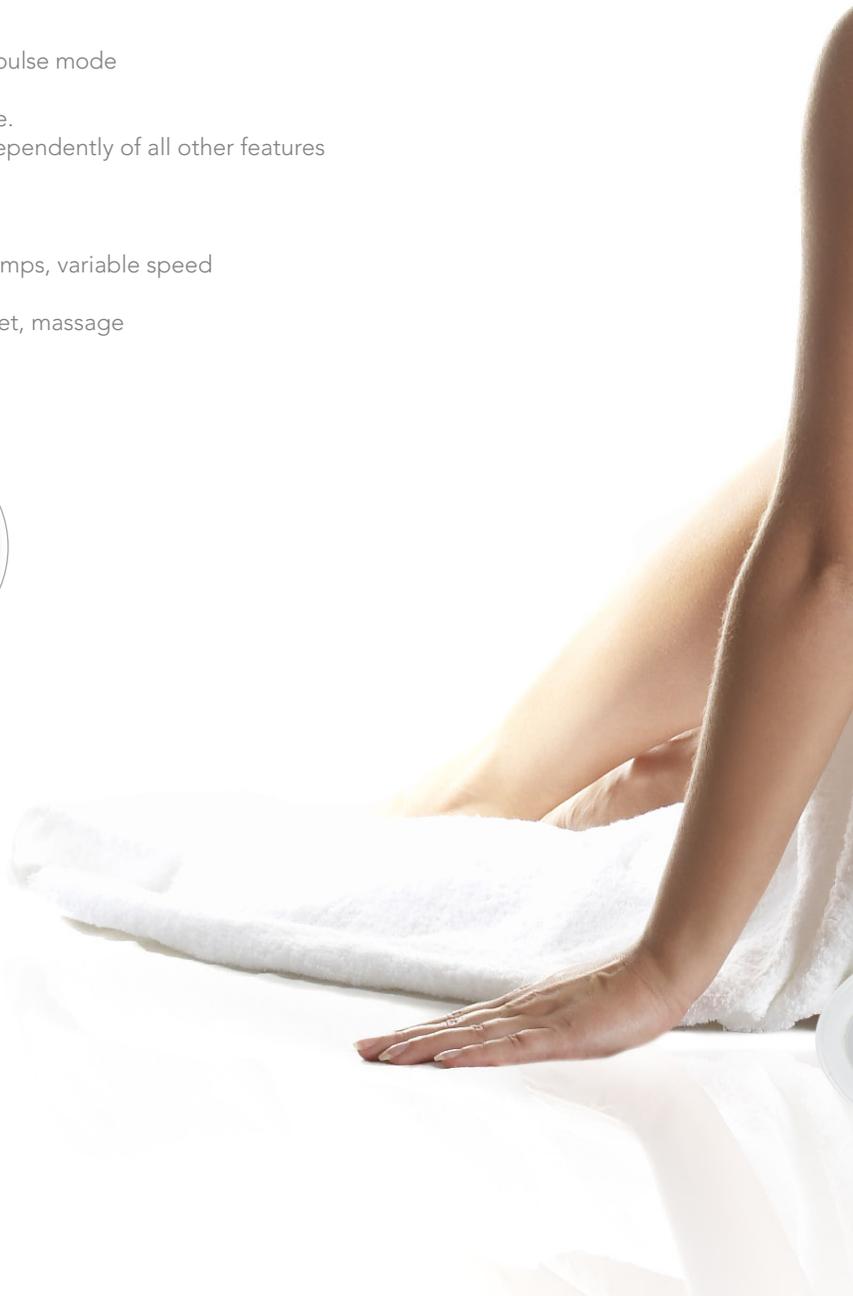

#### LIGHT BUTTON

Can be controlled independently of all other features

#### BACK JET BUTTON

#### MASSAGE BUTTON

Change speed (back jet/pillow)

#### PERSONALIZED OVERLAY DESIGN

By integrating customized designs with our manufactured products, we gain the ability to differentiate ourselves from that of our competitors. The appearance of the graphical elements such as the text, buttons, button icons, and background graphics can be designed to fit the specific needs of our customers.

## PURIFICATION ►

### BATH OZONE PURE AIR

#### BATH PURIFICATION

Ozone is the most powerful oxidizer and disinfectant, and has been used for years in whirlpool baths, spas, hot tubs, and swimming pools, hot water etc. Ozone is not only safe for the environment, but it leaves no chemical by-product in the water when used.

#### FEATURES

Ozone rids water of disease-causing micro-organisms

Ozone kills bacteria 3,000+ times faster than traditional chemicals such as chlorine and bromine

Compacted in size for ease of placement

# AROMATHERAPY ►

## SOOTHING SCENTS THAT SET THE MOOD

Our sense of smell can have a significant impact on how we feel, which is why aromatherapy is regaining popularity today as a healing art. Combining the concepts of fragrance and treatment, aromatherapy has been used for thousands of years by the Greek, Roman and Chinese natural healers to affect the whole person in mind, body and spirit. Pleasant scents can boost relaxation and contribute to creating a desirable atmosphere.

### RELAXING (PURPLE)

Soothe your senses with the sweet, herbaceous aroma of Lavender. With a peaceful aroma, lavender is a wonder to experience, especially for the nervous system. It has been used to assist in treating depression, headache, hypertension, insomnia, migraine, nervous tension, and other stress related conditions

### ROMANCE (GREEN)

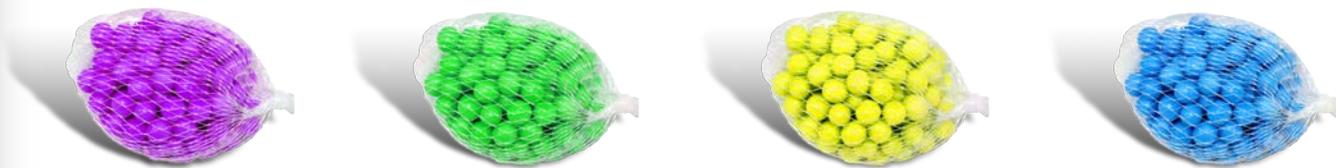

Unwind and escape with the beautiful scents of Rose, Ylang Ylang, and Sage. This sensual aroma soothes and uplifts and has a regulating effect on excited and nervous conditions.

### ENERGY (YELLOW)

Refresh and rejuvenate with the aromas of peppermint and eucalyptus. These scents clear the head and sooth the emotions, sooth the digestive system, relieve tired feet and mind.

### TRANQUILITY (BLUE)

Relax yourself with the sweet, peaceful fragrance of Chamomile. Chamomile is thought to calm the spirit, promote good health, and relieve stress. It is a natural medicinal herb that gently relaxes the mind and body, preparing one for sleep.

## PURGE CYCLE ►

### SANITARY CARE — ENSURING YOUR SAFETY

#### THE PURGE CYCLE FOR YOUR WHIRLPOOL TUB

The purge cycle is designed to remove standing water from the plumbing, while drying the air delivery system. The BWG Quiet-Flo Blower and electronic controls are equipped with a purge cycle as a complimentary standard feature.

#### AUTOMATIC PURGE CYCLE

30 minutes after the system is turned off, the bath control is timed to purge the air system for two minutes. When the purge cycle ends, all equipment turns off. The air system is completely dry and helps to maintain a sanitary plumbing system.

#### PURGE CYCLE WITH OPTIONAL CONDUCTIVE WATER SENSORS

Two conductive water sensors are installed low in the tub, near the drain, which is activated whenever the bath has been drained or a session use is finished. The bath control is then timed to purge the air system for two minutes. When the purge cycle ends, all equipment turns off. This ensures a sanitary air system, as all standing water during a purge cycle is removed from the plumbing and the air system is dry.

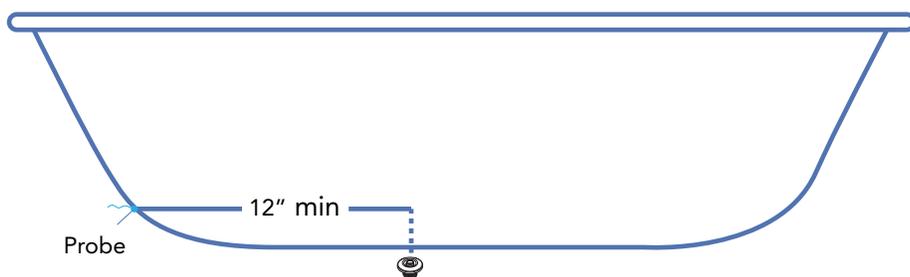

Optional: The conductive water sensor can also be mounted to help prevent a pump from operating if the water level is below a predetermined level. The connectors are installed so that one connection is in the suction line and the second connection is installed in the water pressure line.

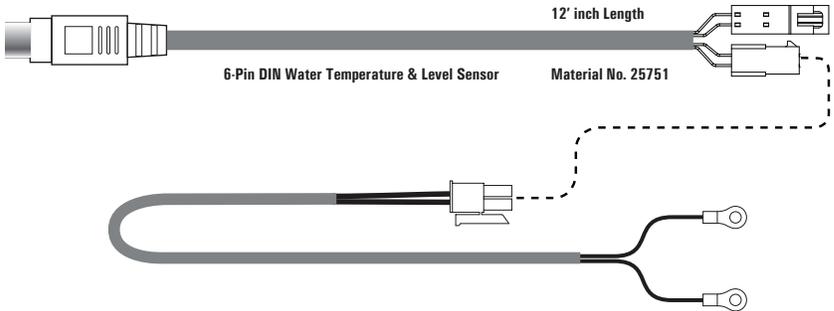

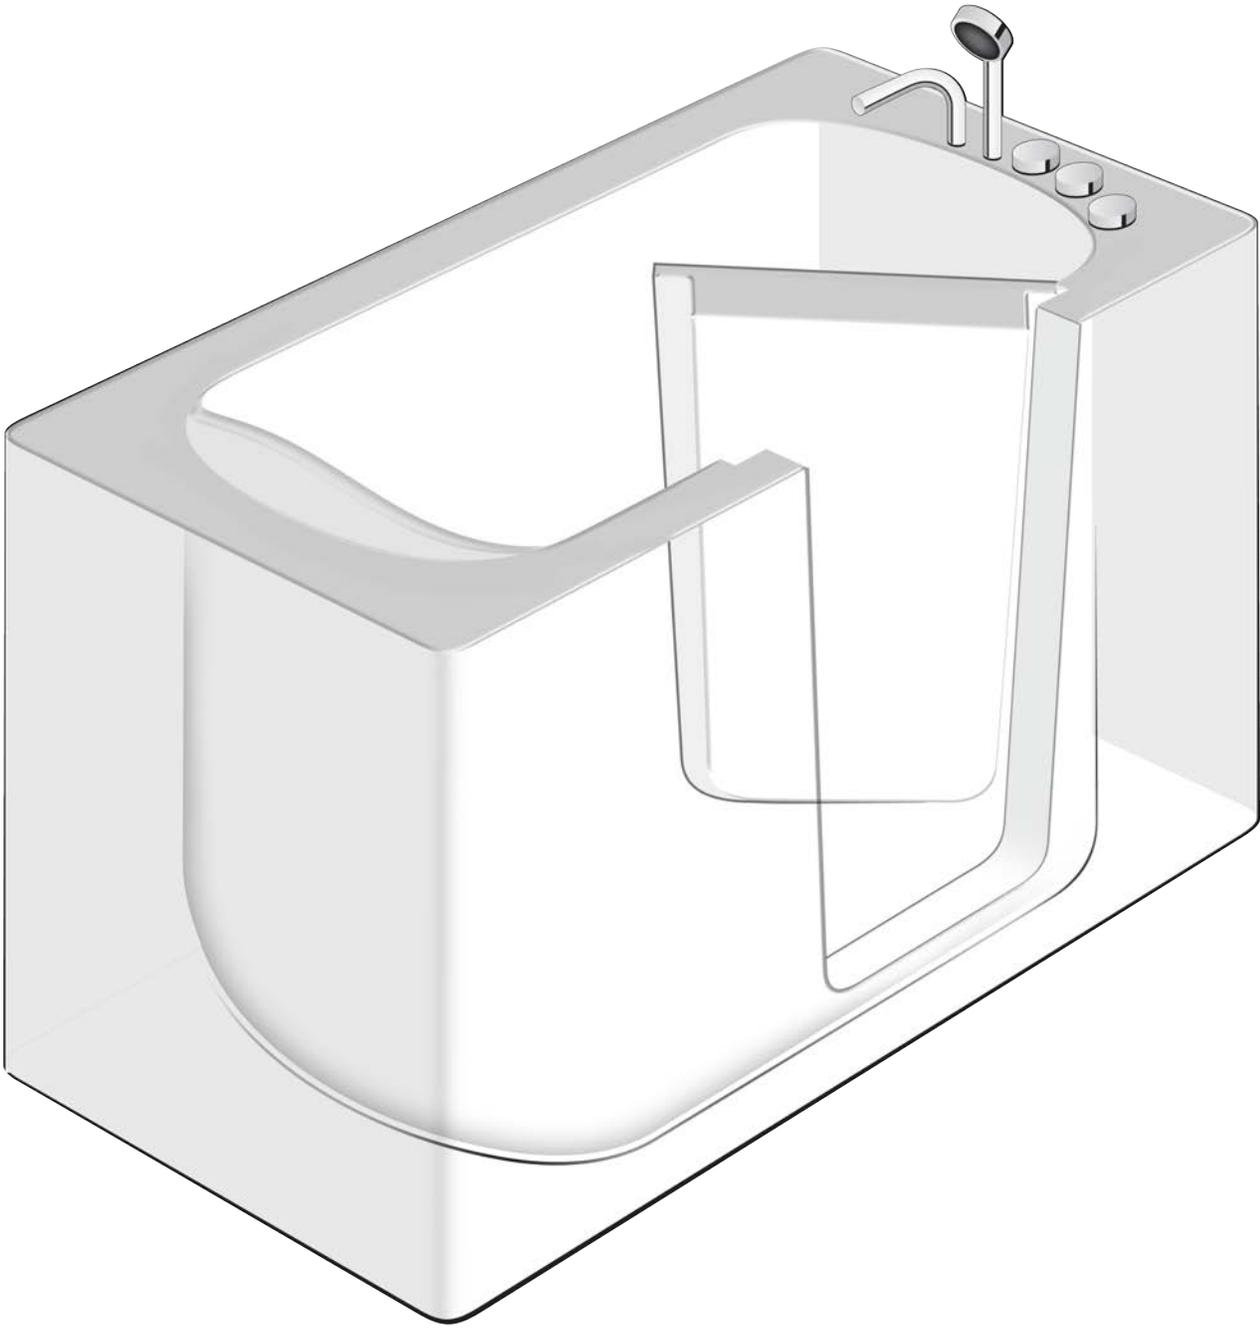

- After the water has been drained; the purge cycle is automatically activated 30 minutes after the bathtub has been completely emptied.
- The purge cycle is automatically activated after showering, washing or rinsing the tub, whether the system has been used or not.

#### AIR CHANNEL INSTALLATION

#### AIR JETS INSTALLATION

## PLUMBING OPTIONS: MANIFOLDS & PVC HOISING ►

EXPERTLY CRAFTED AND DESIGNED FOR THE MODERN TUB

### 4 OUTLETS OR 8 OUTLETS
