High Reliability from a Single Source

Balboa's spa entertainment system is an integrated solution that gives you a high quality sound system with the same reliability you have come to expect from us. We developed a new topside and power supply, and teamed up with a stereo supplier with the same reliability standard, to bring together all the necessary components. This way you don't have to mix and match all the pieces yourself.

The best of two worlds

Balboa has teamed up with Jensen to include a stereo that has been designed for the spa industry. Most spa stereos have been adapted from auto stereos with conformal coating and are prone to failure. But we demanded a stereo that would stand up to the harsh spa environment and deliver the same high reliability as the rest of Balboa's products. Jensen stereos are waterproof and are built to meet IPX5 standards. New models are planned to meet IPX6 standards which means that "... water projected in powerful jets against the enclosure from any direction shall have no harmful effects..." Now that's the best of both worlds for reliability.

Jensen and Sirius are registered trademarks.
